COMPUTER SCIENCE

Professional Experience

Software Developer
Kingstown Consulting (Mar 2026 – Present)

Developed a complete accounting system for commercial property management.

Formation

Universidad de Costa Rica

Computer Science
2022 - Current

Liceo María Auxilidora
2017 - 2021

Project Experience

Enterprise Accounting System
Designed and developed a complete accounting system for commercial property management, supporting day-to-day financial operations.

Key contributions:

- *Developed Accounts Payable and Accounts Receivable modules.*
- *Implemented bank reconciliation and journal entry workflows.*
- *Designed relational database schemas and business logic.*
- *Built backend services using .NET and PostgreSQL.*
- *Processed electronic invoices (XML) and integrated accounting workflows.*
- *Integrated Odoo ERP with custom business processes.*

Languages

- Spanish: Native
- English: C1 (Reading and Listening)
- Certification: English Proficiency Test – School of Modern Languages, University of Costa Rica (2021)

Personal Profile

Final-year Computer Science student with professional experience developing enterprise software solutions using .NET, PostgreSQL, React, and Express.js. Experienced in designing and implementing business-critical systems, including ERP integrations with Odoo, accounting software, and full-stack web applications. Comfortable working across backend, frontend, and database design, translating business requirements into scalable software solutions. Interested in software engineering, system architecture, and building reliable applications that solve real-world problems.

Technical Skills

- Programming Languages: C#, JavaScript, Python, C, C++
- Backend Development: .NET, ASP.NET Core, Express.js, REST API development, business logic implementation
- Frontend Development: React, HTML, CSS, JavaScript, Vue.js
- Databases: PostgreSQL, SQL Server, SQL, relational database design, query optimization
- ERP & Business Systems: Odoo ERP, ERP integrations, electronic invoice (XML) processing, accounting software development
- Tools & Technologies: Git, GitHub, Docker, Linux
- Software Engineering: Database design, API design, software architecture fundamentals, business process analysis
- Other: Competitive programming, automation with AI tools
